

Brush Fencing

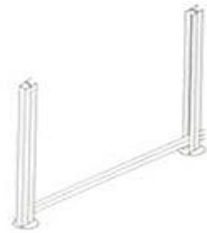

If you like the privacy that a colorbond boundary fence offers, but prefer a warmer and more rustic finish - our stylish Brush Panel Fencing could be the perfect solution. Tea tree branches are stitched together with galvanised wires and can help to drown out unwanted road noise. Made in Australia with sustainably sourced Tea tree and pressed to 50ml thick, sturdy and strong - its quality is far superior to many of the other options on the market today.

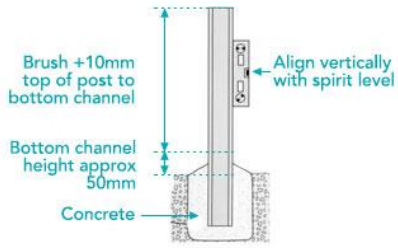

Step 1
Mark out and dig post footings at 1800mm hole centres and 600mm deep.

Step 2
Assemble the frame of your panel by screwing two C section posts back-to-back and place posts in holes.

Step 3
Screw the bottom rail (55mm high x 60mm wide U channel) into position allowing 650mm overall for concreting into ground and the lower rail to sit around 50mm above ground level

Step 4
Using a temporary brace to support the posts, concrete the posts into the ground. Ensure the posts are aligned vertically using a spirit level. Allow the concrete to set overnight.

Step 5
Insert brush panel, ensuring it is framed within the side posts and bottom rail.

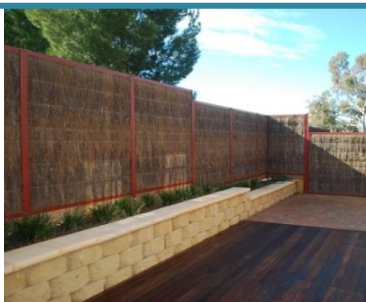

Step 6
Fit top rail and screw into position.

Specifications

Panel Height	1800mm
Panel Length	1800mm
Panel Thickness	50mm
Top & Bottom rail size	55mm high x 60mm wide channel

Brush Fencing

A Warm and Rustic feature – Privacy without cold metal finish – Can help reduce irritating road noise
